**Instructions**

- 1) This format applies to USSOCOM. It also applies to all the services for UAVs, to the Navy for SOF Maritime Forces, and to the Army for MISO and Civil Affairs units.
- 2) The goal of this format is to provide quantities of 'Force Structure Elements' (platforms) by 'Component.'
- 3) The fields, 'Force Structure Type' and 'Inventory Type' are 'Closed' lists so you cannot add items to them. If a new value is required for either of these fields, create a new Functional Issue in the SNaP Issue Resolution System (SIRS).
- 4) When entering the Force Structure Type of Select SOF Forces, the 'Inventory Type' will be 'SOF Forces' and FYs 2014 – FY 2020 will reflect the number of units. All other 'Force Structure Types' will reflect authorized and actual equipment quantities for FY 2015 – FY 2021.
- 5) If there are additional SOF Forces or Equipment (other than aircraft) that are not currently listed in the table below, please create a new Functional Issue in the SNaP Issue Resolution System (SIRS). Include the platform name or unit type in your submission and they will be added to the list of valid values.
- 6) Quantify Unmanned Aerial Vehicles (UAVs) by model and quantify MISO equipment by type.
- 7) Provide a narrative description for all force changes or employment changes due to home stationing movement and construction. Also include a narrative explaining all instances where the authorized quantity changes between years.
- 8) Report MISO units and equipment in this format. Report operational funding for MISO under the SNaP Information Operations format.
